Safeguarding Genetic Diversity

Spanish Goat Registry

Safeguarding Genetic Diversity

We are Spanish goat producers coming together to promote Spanish goats as a viable and sustainable meat goat while at the same preserving and promoting the diverse genetic gene pool of the Heritage Breed Spanish Goat that is now on the Conservation Watch List.

Breeders trusting breeders to verify and maintain a source of Spanish genetics, as well as manage a DNA Registry of Spanish Goats.

We accept DNA only on those goats that are previously verified as pure Spanish. We require a Bill of Sale from the seller which includes the breeder name, Scrapie tag number and the breeder of the dam and sire.

We are proud to ensure the most efficient and hardy goat in the United States of America.
